

**AMX** hardware and software solutions simplify the way people interact with technology. With the increasing number of technologies now available at home and at work, AMX solves the complexity of managing these technologies with reliable, consistent and scalable systems.

CPD title:

## Integrated Controls

### Seminar details

This fast paced seminar covers the reasons for integration and is designed to help you deal with clients and other design team members who wish to install a variety of electronic systems into their homes or other premises. AMX explain how connecting people effectively with their buildings and communities provides value for all concerned.

The seminar explains the reasons for integration:

- Action at a distance
- Managing complexity
- Adding logic
- Automation
- Consistency of operation
- Elegance and ease of use
- Single point of control

Simple examples are used from a variety of environments: residential, retail, education, office, hospitality, healthcare, public sector, control centres, military and houses of worship.

The focus is on understanding the design options for providing, simple, reliable, streamlined control.
