CPD title:

6 CPD seminars: see below for details

1. **Decorative Fire Protection for Internal Linings**
2. **Extending Maintenance Painting Cycles**
3. **Identifying and Specifying Paint Treatments for Metal Substrates**
4. **The Decoration of Floor Surfaces**
5. **Anti-bacterial Coatings for Internal Surfaces (Seminar & Online version)**
6. **Understanding Colour**

Seminar 1 details

The decorative fire protection seminar focuses on flame retardant coatings, how to protect internal linings and highlights the importance of flame retardant coatings when challenged to meet Building Regulations and fire safety guidelines.

Seminar 2 details

The seminar extending maintenance cycles provides guidance on maintenance painting, defects and remedial solutions and highlights how to achieve sustainable and manageable life cycles.

Seminar 3 details

The specifying for metal substrates seminar covers widely used metal substrates within today's ever-changing construction industry and discusses how performance coatings can protect against erosion from environmental pollution.

Seminar 4 details

The decoration of floor surfaces seminar provides an understanding of the different types of floor substrate and highlights which paint solutions protect and enhance aesthetic appearance.

Seminar 5 details

The seminar anti-bacterial coatings reveals how it can help in the fight against infections caused by harmful bacteria. It explores, with a hygienic cleaning regime, how it can create peace of mind and a healthy environment.

Seminar 6 details

The seminar is designed to educate architects and designers on the fundamentals of colour and how it can help them in their daily business.

- The science of colour and how to see it
- Colour psychology and how colour helps us in life
- Communicating colour - NCS, RAL, BS systems
- Colour in practice

Duration

All seminars are 1 hour with questions.
