

CPD title:

## 7 CPD seminars: see below for details

1. **Ceramic Tile Internal Movement Joints: Why, What and Where?**
2. **Uncoupling Membranes: Appropriate Applications**
3. **Modular Screed Systems for Installing Underfloor Heating with Tiled Surfaces**
4. **Ceramic Tile Waterproofing Systems: Why and How?**
5. **Creating Effective Balcony and Terrace Solutions for Ceramic Tile and Natural Stone Coverings**
6. **Modular Underfloor Heating Systems for Ceramic Tiled Floors**
7. **Tiling in Wet Rooms**

### Seminar 1 details

- Requirements and application techniques of stress relieving movement joints
- Typical problems and how they can be avoided
- Typical examples of movement joint profiles

### Seminar 2 details

- What are uncoupling membranes?
- Why they are needed, and where they should be used
- Benefits of modern uncoupling systems

### Seminar 3 details

- Reduced height and weight benefits
- Preventing ceramic tile and natural stone coverings cracking, splitting, tenting and debonding
- Why screed movement joints are no longer needed

### Seminar 4 details

- Requirements and benefits of waterproofing ceramic tile and natural stone coverings
- Examples of insufficient waterproofing
- Benefits of mat, or membrane, based waterproofing systems

### Seminar 5 details

- Fully functional assembly systems for external ceramic tile and natural stone coverings
- Appropriate protection for tiles when exposed to the elements
- Incorporating drainage systems into external assemblies

### Seminar 6 details

- Benefits of modular screed systems incorporating water based underfloor heating systems
- Their ability to protect ceramic tile and natural stone floor coverings from cracking, splitting, tenting and debonding
- Ability to run at reduced temperatures, saving energy and costs

### Seminar 7 details

- Why waterproofing is important
- Methods of waterproofing
- Design considerations
- Substrates
- Applications and installation

### Duration

45 - 60 minutes

### Also available

Handout pack for each seminar  
Technical product information  
Comprehensive website

### Areas covered

- The UK and Ireland

### Contact details
