THE BATHING SYSTEM  
FOR SPECIAL CARE

...with people in mind

## MAKE THE BENEFITS OF BATHING ACCESSIBLE

Time in the tub is time well spent. Bathing is one of life's pleasures, an enjoyable and relaxing interlude that also provides important benefits for health and wellbeing. For people in care environments, bathing is not just about keeping clean, it is about maintaining and enhancing quality of life. The considerable benefits of bathing should be accessible for everyone.

## CONTOURED – FOR SPECIAL CARE

***Sovereign* has a unique contoured tub, an innovative shape that offers good support under the knees. This design, in combination with the system's reclining comfort seat, gives the resident with reduced torso strength the right degree of support and stability, while providing the ideal water depth for an enjoyable bath.**

A redesign has given *Sovereign* a smoother, friendlier exterior that blends in well with any care setting. Redesign improvements have also eliminated the need for a shower pole.

*Sovereign* has many features to improve safety and efficiency, such as electronic scalding protection and the time-saving Auto Fill function. Product hygiene is a top priority and options include an integrated disinfection system and auto disinfection of the spa.

# KEY FEATURES

## Emergency stop

- Efficient and easy-to-use emergency stop for an immediate stop of all functions

## Shower handle

- Shower handle with adjustable spray; hard or soft water spray for different needs and skin conditions.

## New control panel

- Positioned for carer convenience at the tub's foot end
- Easy control of functions such as air spa and raising/lowering of the tub

## Handset control

- Control of functions: lift in/out
- Allows carer to work close to the resident

## Disinfection

- An integrated disinfection system with built-in disinfectant spray handle operated from the control panel.

### Leg support

- The innovative contoured shape of the tub offers good support under the knees

### Transfer chair

- An integrated solution for safe transport, toileting, tub transfers and bathing
- Options include commode or reclining comfort seat and fixed or dockable seat with wheeled chassis for transport

### Height adjustable

### Belts

- Adjustable belts for secure and comfortable use of the transfer chair

## ASSISTED BATHING CYCLE

The ideal configuration for the assisted bathing cycle is a height-adjustable tub with transfer seat lift, and a wheeled chassis for transport. After attaching the seat to the chassis, the carer collects the resident. In the bathroom, the seat is docked with the lift. The seated resident is raised and then lowered into the tub under handset control.

## DESIGNED FOR EXTRA SUPPORT

***Sovereign***, a complete system for the assisted bathing cycle, has a tub with an innovative contoured bottom. This is an optimum design for people who require a high level of support due to reduced torso strength, such as those suffering from muscular dystrophy.

The system, intended for the private or semi-private bathrooms, is suitable for settings such as family homes and special care facilities. *Sovereign* meets the needs of adults and children within the A to C categories of the Mobility Gallery.\*

For residents, *Sovereign* offers a safe access solution allowing them to fully enjoy the benefits of bathing. Using the handset to operate the integrated transfer seat, a single carer can manage assisted bathing sessions without manual lifting.

Choosing *Sovereign* can enhance the quality of people's lives in special care and the working lives of their carers.

### **Carer benefits**

- Ergonomic working methods
- No manual lifting
- Simple-to-operate system
- Handset control
- Improved working environment

### **Resident benefits**

- Optimised system for individuals in special care
- Contoured bottom offers greater support
- Safe, dignified handling during the assisted cycle
- A complete solution that minimises transfers
- Greater comfort and security to enjoy bathing

\* See back pages for further details.

# PRODUCT SPECIFICATIONS

## Space requirement

Blue area shows the minimum working area required for the staff to be able to use the mechanical aids in an ergonomic way from one side.

\* NB Free space can be reduced to 1100 mm (43 1/5 inches) if lift transfer is not required within the bathroom.

## Mobility Gallery

Suitable for Albert, Barbara, Carl and Doris

- A Albert**, who is ambulatory and independent
- B Barbara**, who can support herself to some degree
- C Carl**, who sits in a wheelchair and has little capacity to support himself
- D Doris**, who has no capacity to support herself

Please contact ArjoHuntleigh for further information on the Mobility Gallery™.

## Accessories

Head support
