

NIVA BATH

EVEN MORE USER CONVENIENCE IN THE BATHROOM

Today bathrooms are being viewed more frequently as an area of calm and tranquillity, the chance to create your own private spa. Vasco understands what is required in order to create this environment. To provide the perfect ambient temperature for a room such as this, Vasco have developed an extensive range of aluminium or steel design radiators and accessories. These are connected to the central heating boiler or the power supply and are available in either white or a wide range of colours suitable for bathrooms. How do you make a bathroom radiator just that little bit more than a stylish heat source?

Vasco has the answer with the new Niva Bath! Inspired by the successful Niva radiator, the new Niva Bath stands further back from the wall (at a distance of 325 mm). Allowing more space at the rear of the radiator for additional functionality such as shelves for towels. Niva Bath is available in 55 colours and the shelves come standard in black (RAL 9005), or white (S600).
