

WALL TD.BF.LO.B1.BL

The TD.BF.LO.B1.BL range of Access Panels are simple to install and suitable for wall access where a ceramic or marble finish is required and allows easy access into the cavity/void where regular maintenance to services is required.

Description

This panel is designed to fit into the structural membrane of a joint-less plasterboard wall system. It is manufactured with a 20mm beaded frame and flush plasterboard door with touch catch or standard budget lock.

Construction

The Panel is manufactured from Zintec steel, has a fully demountable plasterboard door and 60mm deep frame with fixing holes. This panel is powder coated with RAL 9010 20% gloss (other colours

available). The door is fitted with slot location point/hinge and is lockable with a standard budget lock.

Fitting

Make sure the structural opening is at least 10mm larger than the panel, E.G. 600x600 needs to be 610x610. Remove the door from the frame, install the frame into the set hole, fix through the appropriate fixing hole. Ensure the frame is flush to the plasterboard. Check the frame is fitted square by measuring corner to corner. Refit the door, lock with the key provided,

the door and frame should be flush.
