

CPD courses tailored to **your** development

SENIOR ARCHITECTURAL SYSTEMS

Double credits available for RIBA accredited architects

With more than two decades' experience, Senior Architectural Systems is an innovative driver of the market, offering technical excellence, performance, value, and creativity to the many fabricators, architects and contractors with whom we are proud to be associated.

Having been involved in the design, detailing and delivering of many BREEAM rated buildings, our experience comes into play in assisting to create, not only stunning projects, but ones which offer serious sustainable solutions for the future.

It is this experience that has allowed Senior to create a series of RIBA accredited seminars, which can be taken in sequence or as standalone CPD's and include 'Designing Sustainable Fenestration Systems' and 'Detailing and Delivering of Fenestration Solutions'.

FREE CPD COURSES NOW AVAILABLE **DESIGNING SUSTAINABLE FENESTRATION SYSTEMS**

With careful design and specification, up to 40 credits of the total 109 available within BREEAM certification for new buildings can be achieved. The Senior 'Designing Sustainable Fenestration Systems' CPD explains where these credits can be obtained and the methodology required.

DETAILING & DELIVERING OF FENESTRATION SOLUTIONS

This RIBA approved CPD seminar assists in accurately identifying and overcoming the detailing and interface issues when specifying windows, doors and curtain walling. Accredited under the RIBA CPD Core Curriculum subjects: Designing and building it: design, construction, technology and engineering / Climate: Sustainable Architecture
