# one-piece front plate

## One-Piece Front Plate

This mailbox system is the most appealing for front delivery and rear retrieval.

The system can be fitted through a cavity wall, by an entrance door through a single/double glazing panel or in any frame. Its one-piece design makes the unit neat and offers the latest improvements against vandalism. Made to measure, the front plate is made of 3mm thick aluminium or stainless steel and can be adapted to any configuration. The curved flap design enhances the appearance. Each flap has gasket seals to ensure water-tightness.

The mailboxes can be adapted in finishes and sizes to suit any exterior or interior location and all come with a lockable inner door (cylinder with 2 keys). An internal anti-theft device is also fitted as standard behind the flap.
