freestanding applications

Freestanding Applications

In situations where there is not enough wall space, the wall cavity is not very deep or the mailboxes are simply required to stand alone, the DAD freestanding range provides a number of well-designed solutions to meet these requirements. These can be installed internally or externally. The wide choice of surrounds and frames allow the units to be integrated with either the interior or exterior decor of the building.

The mailboxes and other components can either be made of electro-galvanised steel with door and flaps in aluminium or in stainless steel and take standard A4 size mail. Each flap has gasket seals to guarantee water-tightness. An internal anti-theft device is fitted as standard behind the flap and the boxes in this range have good waterproof features. All boxes have a door with a security lock complete with 2 numbered keys.
