

FineFloor FibreBoard

Underlay

Insulating panels of natural wood fibre, designed to **eliminate uneven floors**

■ On the level

As well as insulation, FibreBoard provides a level subfloor for the final floor covering, offering stable support and helping your floor last longer by smoothing out the most uneven areas.

■ Keep out the cold

The exceptional thermal insulation of FibreBoard is perfect for use on very cold subfloors such as cellars, to make your room feel so much cosier and comfortable.

■ Easy to fit

Made from traditional natural wood fibre, you'll find FibreBoard really easy to line up, cut and fit - saving you a great deal of time and effort wherever you're installing it.
