# The World's Leading Manufacturer of Specialist Entrance Matting Systems

## Why entrance matting?

An effective entrance matting system protects internal floor finishes by removing the dirt, grit, grease and moisture brought in every time someone enters your premises. Excluding these unwanted visitors prolongs the life of entrance flooring and reduces maintenance costs to keep your entrance clean and safe.

## Colortread from EMS

First impressions count – and that's why Entrance Matting Systems have created Colortread.

In Colortread, EMS have developed a unique system that not only removes foot-borne dirt and moisture with remarkable efficiency, but also offers an attractive visual alternative to other products on the market.

The Colortread range is constructed using a rigid aluminium base which is stronger than wired products, and has the added advantage of making it easy for you to update your colour scheme whenever you like, simply by changing the coloured scraper bars and inserts.

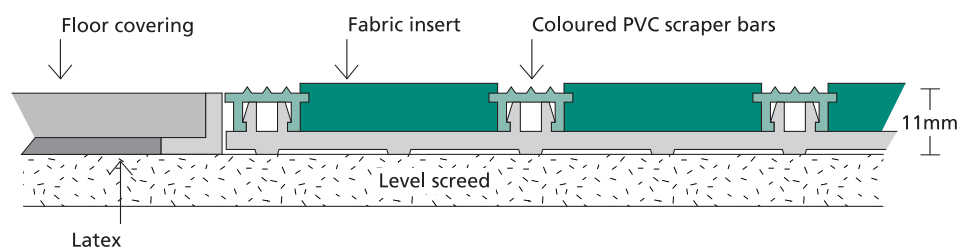

No other product offers such a comprehensive range of colours. And you can mix and match any combination of inserts and scraper bars to create your own scheme, no matter how whacky or conservative. We can even produce customised logo mats to match your corporate identity.

Unusual shapes and configurations are no problem. We offer a bespoke solution for every application, no matter how large or how small. And of course Colortread is durable, long-lasting and easy to maintain.

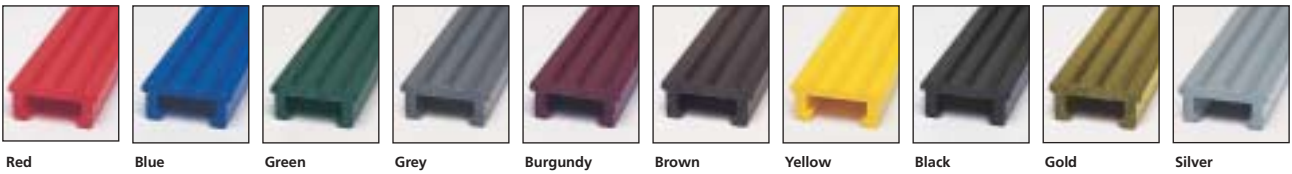

## Low Profile

\*When properly installed and maintained.  
Full details available on request.

# Standard Scraper Bar Colour Range

## Built to the Highest Standards

Colortread is professionally designed, engineered and hand-built in the UK, with the requirements of architects, designers, specifiers and end-users in mind.

EMS uses only the most effective dirt and moisture absorbing fibres available in the market today. We build to the highest standards of stability and safety, incorporating sound-absorbing and non-reflective components to ensure safe, comfortable access for wheelchair users and those with visibility problems.

We offer engineered solutions suitable for the widest and most demanding range of commercial, leisure, retail and industrial applications, both internal and external. Trolleys and wheelchairs pose no problems. We even offer low smoke emission rubber for Section 12 Underground installations.

At EMS we care about the environment. Environmentally friendly or natural products such as coir are used wherever possible in the manufacturing process, and we welcome the return of old mats for recycling.

## Accessories

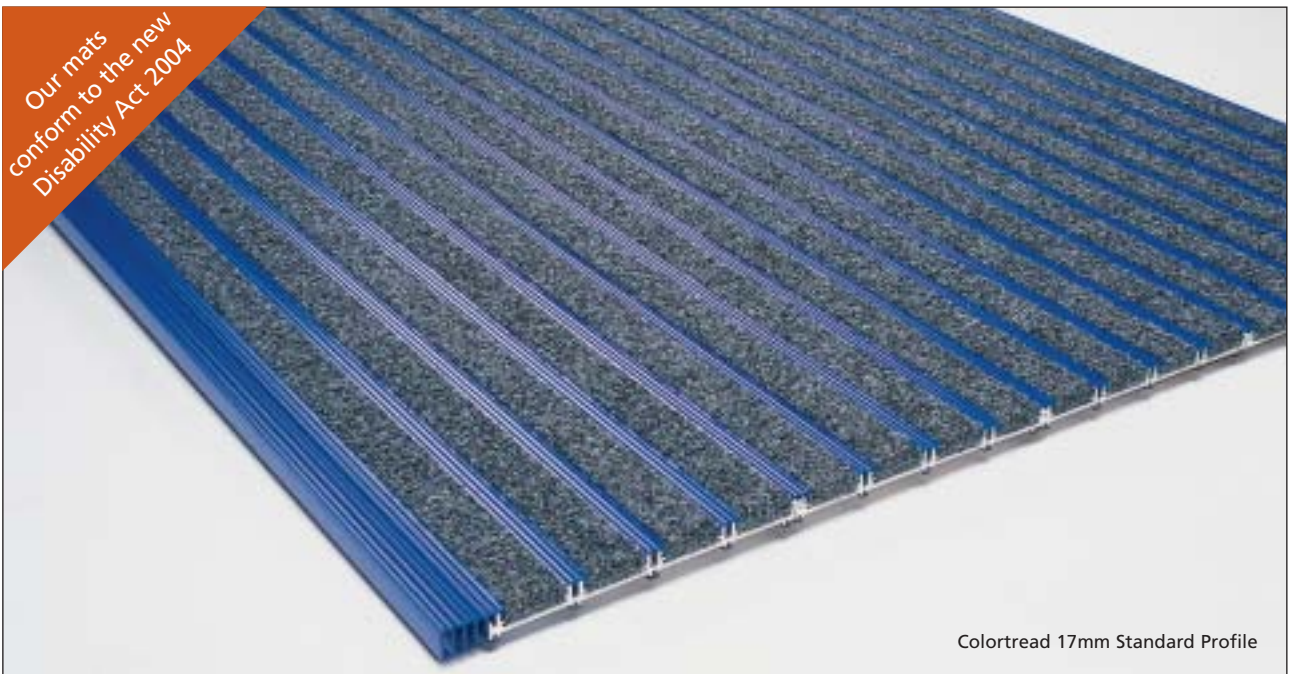

We offer a complete range of trims and frames to put the finishing touches to your new Colortread matting system:

- recessed angle frames in aluminium, brass and stainless steel.
- aluminium ramping for surface mounting.
- notched angle for curves and shaping on site, in aluminium, brass or stainless steel.

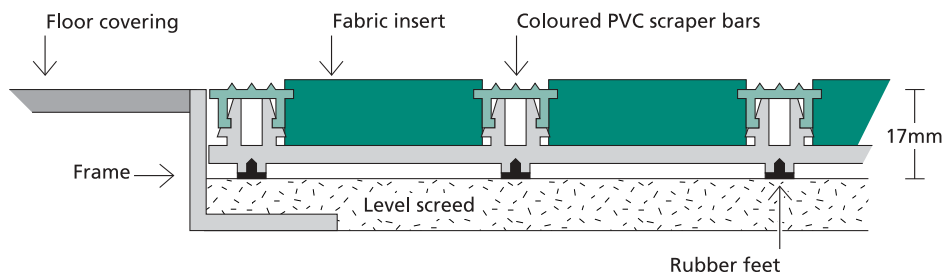

All angles have polished top edges and come mitred, drilled and countersunk for mechanical fixing. We can also offer welded frames subject to size.

Natural Coir Matting

## Standard Profile

## Insert colours available

EMS CT 001 black/beige/red/green/grey/blue/anthracite/brown  
 EMS CT 002 black/tan/green/grey/blue/burgundy/anthracite/brown  
 EMS CT 003 anthracite/light grey/beige/red/blue/olive/brown  
 EMS CT 004 natural/blue/red/green/grey/anthracite/black/  
 dark brown  
 EMS CT 005 black

## Drainage

CT 001 is available in a drainable option (CT 001-D) to remove excess water when used externally or fitted to exposed areas.

## Rubber feet

Maximum sound absorption, silent underfoot (standard profile only).

## Dimensions

Colortread mats can be manufactured to any shape and size. They can be produced up to 4 metres L/R without a join. Unless instructed otherwise, our engineers will manufacture large mats in the most efficient way for handling and transport.

## Frames

25 x 25 x 3mm or 25 x 25 x 5mm angle sections. Available in aluminium, brass or stainless steel. Aluminium ramp and mitre-cut profiles also available.

## Maintenance

Daily cleaning by vacuum cleaner is essential. Occasional deep cleaning using the hot water extraction method will help retain

optimum appearance and revive the pile fibres. Inserts and/or scraper bars can be replaced as and when required, to create a new look entrance matting system or transform a colour scheme at a fraction of the full replacement cost.

## Warranty

EMS offers a 10 year limited warranty on mats correctly installed and maintained. Full details available on request.

## Services

Please contact our factory direct for sales, samples and technical advice. Our experts are always happy to answer questions and help you exercise your creativity.

## Delivery

Normally 5-7 days.

## Specification

Install EMS Colortread. Please state choice of:

- profile (standard or low)
- insert material (product codes CT 001-005)
- insert colour
- scraper bar colour

Fitting to be carried out in accordance with manufacturer's instructions.

## Our Aim

The perfect solution for every application. Making each entrance area unique.

**The market leader in the design and production of entrance matting systems.**
