

Based upon framing of just 16mm thick, IsoTec's 12mm toughened glass door leaf is surrounded by aluminium. Either match or contrast with the corresponding partitioning's framework by polyester powder coating it in a vast range of colours or anodised, for a metallic finish. Glass with protected glass edges is a benefit as the framing prevents glass to glass edges from damage.

Performance

Firerating

non fire rated

Acoustic attenuation

up to 34dB Rw

Maximum height

up to 3000mm

Deflection allowance

n/a

Try our ultra slim IsoTec door for when style and substance are desired

Featuring a 16mm wide visual frame, IsoTec's 12mm toughened glass door leaf is surrounded by aluminium.

Either match or contrast with the corresponding partitioning's framework by polyester powder coating it in a vast range of colours, or anodise for a metallic finish. Protected glass edges are a benefit, as the framing prevents glass-to-glass damage.

Aspirational Elegance

IsoTec is the ideal complement for our LOFT20 partitioning range. This industrial style paneled glazing gives a fashionable yet modern visual, match the width of the LOFT system's bands to the 16mm width of IsoTec's frame, for perfect symmetry.

If banded glazing is not required, partner IsoTec with p20 for a stunning slim framed appearance. Due to its sleek aesthetic, IsoTec is resoundingly popular with our corporate clients.

In addition, an effective acoustic attenuation of up to 34dB Rw can be achieved, when acoustic drop seals are added.

 ACOUSTICS
up to 34dB Rw

 DIMENSIONS
up to 3000mm
