

# Complete PVCu Bi-fold Door System

The EASY bi-fold door solution

## How to order:

Synseal can provide you with all tracks, weather strips, gearing and hardware necessary to assemble your bi-fold doors. The top and bottom tracks are supplied in single lengths and the gearing and hardware is in a kit specific to the door configuration being made.

## Aluminium track and weather strip

The aluminium top and bottom tracks are available in white and brown and in two lengths, 4050mm and 6350mm. The weather strip is available in white, brown and caramel and in a length of 2200mm.

Contact Synseal for an order form on 01623 443200.

Item	Section	Colour	Item	Length	Pack Sizes

# Complete PVCu Bi-fold Door System

The EASY bi-fold door solution

# Synseal's new bi-fold door system is **EASY to make** **EASY to fit** **EASY to sell**

It is a complete system for manufacturing reliable PVCu bi-fold doors with less components and drastically reducing assembly time.

Rigid aluminium tracks prevent excessive flex so the doors run smoothly even on long spans with multiple door leaf configurations. The doors are currently configured to open in and we are currently developing open out options.

Synseal's bi-fold doors use standard Legend and Shield door profiles (SynerJy available soon) to reduce your stock holding and utilises Siegenia and Mila gearing. We designed the system in consultation with customers who were already fabricating bi-fold doors, creating a complete system that is simpler to make and more reliable.

- Thermally broken top and bottom aluminium tracks improves thermal efficiency and reduces condensation
- Available in white and brown
- Improved aesthetics due to colour matched tracks
- All components are designed to fit as a complete system to reduce fabrication time and to save money
- Tracks are 4050mm or 6350mm long so wide span openings can be easily manufactured
- Uses existing door profiles reducing stock holding
- Special sealing weather strips complete the professional look of the door
- Uses proven Siegenia and Mila gearing and hardware

*By selling bi-fold doors you are selling the fastest growing product in home improvements – a product that your customer will want to buy.*
