

SUSTAINABLE CHOICE

By significantly enhancing the durability and dimensional stability of fast growing, abundantly available certified wood species, Accoya® wood provides compelling environmental advantages over scarce slow growing hardwoods, woods treated with toxic chemicals, and non-renewable carbon-intensive materials such as plastics, steel and concrete.

The Accoya® advantage:

- Always sustainably sourced from abundantly available, often fast growing wood species
- Use phase advantages: increased life span, less maintenance, superior thermal insulation
- Non toxic and 100% recyclable - a perfect fit with the bio-cycle of the C2C philosophy
- CO₂ negative over the full life cycle

ANNUAL YIELD

[m³ / ha / year]

Annual yield comparison of species in cubic meters of wood produced per hectare per year

¹ Plantation grown

CARBON FOOTPRINT

[kg CO₂ eq / window frame]

Greenhouse gas emissions (cradle to grave) in kg CO₂ eq per window frame in various material alternatives

² Sustainably sourced
³ Unsustainably sourced

ECOLABELS

Accoya® wood has been awarded various accreditations and eco-certifications further highlighting its unique sustainability properties.

LEEDv4: MR1, MR2, MR3, MR4 I1
BREEAM: MAT 1, MAT 5
