About Syska

The Art of Silence

Syska is a UK-based manufacturer and supplier of ground-breaking recycled acoustic products; offering an unbeatable combination of acoustic performance and aesthetic design.

Ideal for meeting rooms, huddle spaces, boardrooms and video conferencing suites, Syska products offer stunning design without compromising on quality or sound attenuation.

Syska products are equally effective in larger spaces, providing exceptional sound dampening in conference rooms, auditoria, retail environments and restaurant installations.

If you are looking for an acoustic product that delivers on both form and function, look no further than Syska. Hear the difference we make.

Our Approach

Beautiful

We believe that high-performance acoustic products shouldn't have to sacrifice form for function; they should complement each other.

Our versatile Skyline and Tessellate ranges are ideal for use in a wide range of applications and offer creative flexibility that is only limited by your imagination.

Functional

Syska products deliver a new benchmark for sound absorption. Manufactured from single-layer, high-impact PET, they boast an NRC rating of 0.75.

Competitive products rely on multiple laminated 6mm layers; resulting in a less dense, less rigid and lower performing product with a typical NRC rating of 0.65.

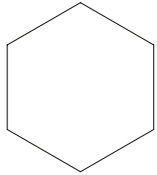

Sustainable

Waste plastics represent around 80% of all ocean debris. Pollution has reached such a level that there are an estimated 46,000 items of plastic floating in each square mile of our oceans. As a result, over 260 marine species around the globe are harmed by ingesting or becoming entangled in waste plastic.

Syska products are made from recycled, single-use plastics and we are committed to minimising further impact on the environment.
