

# CASE STUDY

## Ikea, Sheffield

Working to an exceptionally tight schedule we manufactured and delivered wall copings that complimented the natural stone walling.

### The Problem

We had a 3 week window to manufacture and deliver the stone from receiving the order. All the stone had to be installed before the grand opening of the store. The order comprised of a mixture of straight and radius copings.

### The Solution

We provided various colour samples for the client to choose the most suitable match. The order was fast tracked through the drawing department and following on from drawing approval the units were manufactured and delivered to site on time.

**Client** - Clugston Construction

**Project** - Ikea, Sheffield

**Service / Products provided** - 230 linear meters of Vapour Cured Cast Stone Copings

**Sector** - Commercial

### The Results

The cast stone copings provide both a functional and aesthetically pleasing entrance for Ikea Sheffield.
