

TRANSITIONS

Transitions are flexible edgings that help trim the edges and joins to vinyl floor coverings when they need to be finished off to a different thickness, plus a selection of edgings that cover and protect joins and transitions in different floor coverings. They protect the joints and also prevent worn and frayed floor covering edges from becoming a trip hazard.

Fitting

- i) **Floor Trims - Ramp Edge:** Apply adhesive to the floor and base of the profile. Fit the floorcovering under flap with foot/flange, with ramp down to the other side.
- ii) **Floor Trims - Dual Edge:** Apply adhesive to the floor and base of the profile. Fit the 'thinner' floorcovering under flap with foot/flange and the 'thicker' floorcovering on the other side.
- iii) **Ramp Trims:** Apply the adhesive to the floor, the edge of the floorcovering and the bottom of the ramp edge.
