OUR VISION

...to be the joinery manufacturer of choice...
Our commitment to quality and style has led us to invest in the very latest machinery, combining traditional craftsmanship with new technology. Our strong reputation is demonstrated by the fact that much of our work is repeat business from satisfied customers and referrals.

Whatever your joinery requirements, large or small, SB Joinery can provide you with quality and service that delivers confidence and peace of mind. Your joinery will be created by some of the finest craftsmen who are vastly experienced and extremely passionate about their work.

Operating from our substantial factory in the heart of Hampshire, we also have the advantage of our own in-house wood finishing department. Using the latest technology our paint systems enable us to achieve exclusive product protection, from simple priming and lacquering to the latest high-gloss finishes.

Timber joinery is an affordable luxury and here at SB Joinery we are ready to assist you with your investment.

Read on, it is time to be inspired...

To discuss your requirements, call our Technical Department now on 01264 783143.
Whatever your requirements for doors and frames, we have a comprehensive product range comprising proven styles and designs. We supply all kinds of doors and frames ranging from a simple front door to an 8 door sliding/folding door set. All of our doors are manufactured by skilled craftsmen and this enables us to achieve products of the highest quality.

EXTERNAL DOORS

Entrance Doorsets
French Doors
Sliding Doors
Bifold Doors
Garage Doors
TIMBER - At SB Joinery we only select the finest quality timber for our external doors. They are manufactured in hardwoods such as sapele, iroko or oak. The use of these timbers vastly improves the stability and long-term durability of our doors.

IRONMONGERY - We can supply and fit ironmongery to any door and frame. We supply high performance espagnolette locking systems, or the traditional 5-lever lock system. We can also offer high-tech electronic locking systems.

WATERPROOFING - All of our external doorsets are supplied with draught seals on all edges. We use high quality gaskets, thresholds and water bars and this gives outstanding air tightness and performance.

SPECIALIST DESIGNS - With very skilled craftsmen and specialists in the industry, we can create doorsets with gothic, elliptical and semi-circular heads and other intricate designs.
SB Joinery has been at the forefront of timber window design and innovation for over 20 years.

Depending on the appearance you prefer, the colour and the price you have in mind, we can manufacture your windows in a wide variety of durable timbers.

These include European Oak, Iroko, Sapele, Redwood and Accoya. Whether you are replacing your existing windows or designing a new project we manufacture to the latest thermal, security and sustainability requirements - and can supply FSC or PEFC chain of custody certificates for our timber.

TRADITIONAL WEIGHTS

Traditionally weighted sliding sash windows are a speciality of SB Joinery. We can supply the windows with single or double glazing all with efficient weather seals to ensure optimum thermal performance. The latest Slimlite units also provide an option to have double glazing with thin glazing bars in a conservation area.

SPIRALS

Where a modern reveal detail is required, SB Joinery can provide the Spiral spring balance option for sliding sash windows, giving a slimmed down window section. A new cleaning mechanism is an option on this design to enable ease of cleaning a sash from the inside of the building.
FLUSH COTTAGE STYLE

Our flush cottage style casement windows are ideal for heritage and conservation areas as well as new build projects. Without compromising looks or visual attractiveness we incorporate ironmongery, sections and weatherstripping to give ultimate performance, security and a value-for-money product.

We have various styles of flush casement windows which suit the environment, period, and location in which they are set. We manufacture windows comprising traditional butt hinges to suit stays and fasteners, or for those looking for a more modern performance window, we incorporate a multi-locking system with friction hinges that maintains the classic English window look.

We also specialise in listed properties where existing windows and their sections have to be matched.
STORMPROOF

These high performance windows offer fantastic weather-proofing, air tightness and thermal performance conforming to BS Standards. Our window sections are crafted to comprise a multi-locking espagnolette system and friction hinges which give high security and a very smooth operation. They give excellent weather resistance and durability.

TILT AND TURN

Tilt and turn windows allow for one-handed operation and are inward opening. They can be tilted in to assist ventilation whilst maintaining security features and can be opened in to facilitate cleaning without the use of ladders. They are ideal for windows inaccessible from the ground. They also comply with regulations as fire escapes.
FEATURE WINDOWS

With our sophisticated machining technology and skilled craftsmen, we can produce windows to some superb designs and patterns.

Whether gothic, bulls eye, semi-circular, triangular – the list goes on... we prize our commitment to fulfilling customers’ requirements with our flexible approach.
CONSERVATORIES, ORANGERIES & LANTERN LIGHTS

The ideal way to extend and enhance your home.

We are experienced in manufacturing a vast range of conservatories and orangeries, from traditional Elizabethan style conservatories to today’s more modern designs. The addition of one of these gives an opportunity to be creative with design and break with the tradition of other conventional rooms in the home. It can offer a totally unique environment and transform your lifestyle.

Its uses are unlimited – an extension to living or dining space, a useful office or playroom or even a bright airy kitchen conservatory.

With stately rooms and conservatories, we have to have greater sensitivity and delicacy with design to fit the period whereas with the more contemporary look, a style is needed to create the refreshing atmosphere it requires.

Timber roof lantern lights are an ideal inclusion for flat roof extensions. As well as bringing in light they transform the room. We can build these to any size or design and in a variety of timbers.

We can also supply and fit the glass to our conservatories and lantern lights. There are many different options whether tinted or clear, toughened or single glazed, we can also source a range of additional features such as opening rooflights, fans, decorative finals and motifs.
Lawn Tennis Association, Wimbledon
A £32 million state-of-the-art facility in Roehampton to choose winners in tennis, chose SB Joinery as the winning supplier of their Cedar doors and windows.

Oakgrove School & Leisure Centre, Milton Keynes
This project highlights not only the breadth of our expertise and the quality of our work, but also our ability to meet tight demands in price, quality and delivery schedules.

The timber used was Western Red Cedar, sourced from a CSA certified forest mill in Canada. It was shipped to this country for careful kiln drying before cutting to size. As this timber is very soft we had to take great care and use many different machining skills to ensure a quality result. This was a sizeable and demanding job and we rose to the challenge.
A staircase is so much more than a means of getting up and down stairs. Stairs can be a strong focal point within a home which can transform your entrance hall and enhance your property.

From the simplest closed string staircase to the most grandiose elliptical staircase with continuous flowing handrails, we manufacture staircases to all designs and styles. We are passionate about the quality of our staircases.

Staircases can be closed string, open string or cut and mitred. We manufacture and source balustrading and spindles in a vast range of designs and also offer glass balustrades for the more modern application.

In addition to the domestic market, we manufacture staircases for all types of commercial and industrial buildings.
INTERNAL FITMENTS

Wardrobes / Cabinetry
Dressing Rooms / Libraries
Panelling / Shutters
Bathrooms
Shop Counters / Desks / Bars

Be it a library, bedroom furniture, shop counters and desks, or a study for the family; we can design and make them all.

We are as technically advanced as any of the world’s leading furniture manufacturers, and are capable of delivering most designs you could possibly want for your home. We are experienced in working alongside clients and interior designers to ensure that every detail is scrutinised and that you will receive the best value and be satisfied with your investment.

WARDROBES AND CABINERY

We design our furniture to suit your practical needs as well as your personal style. A complete bespoke solution based on your individual room dimensions and storage needs can be created, along with a wide range of finishes and colour.
DRESSING ROOMS / LIBRARIES

Your own individually-designed library or dressing room, handcrafted from the finest materials to add value to your home. With careful and meticulous design, these can be created with your every need in mind. We are continually innovating to meet our clients’ needs, and to ensure we make the most of every room.
Our skilled craftsmen are experienced in all types of panelling and shutters. From traditional window shutters to prestigious oak wall panelling in a reception room, from period to modern, from plain to intricate, from painted to stained – our quality and attention to detail marks everything we do.

**PANELING / SHUTTERS**
BATHROOMS

We design and manufacture bathroom fittings - bath panels, vanity units, and free-standing furniture. Every element is designed individually to suit the architecture of the home or the fresh ingenious look required. Quality along with durability takes precedent in all our furniture.

SHOP COUNTERS / BARS / DESKS

From simple shop counters to stunning oak panelled bars and receptions, we listen to the demands of our clients and create cutting edge furniture, ergonomically designed. With shop counters and bars, first impressions count – this is what we strive to deliver.
KITCHENS

Our flexible approach means that customers’ personal choices can be accommodated and a wide range of styles can be incorporated, to provide the kitchen of their dreams.

Our use of the latest technology, innovative details and meticulous workmanship enables us to offer an unlimited variety of kitchens, all manufactured to the highest quality and standards.

Our spray-finishing facility allows us to lacquer or spray-paint your kitchen to whatever finish you choose. We also specialise in modern high-gloss finishes where we can reach a gloss level of 90%.
PERIOD ARCHITECTURAL JOINERY

SB Joinery has the facility to produce highly detailed architectural joinery for period houses and historic buildings.

Here are dramatic images showing the high standard of detailing we can achieve. Panelling, cabinetry, one-off pieces or an entire room - we can bring your dreams to reality.

Whether you are a refurbishment company, an interior designer, an historic building owner or a new build contractor, please call us with your requirements.
INTERNAL DOORS

We manufacture all kinds of internal doors from a simple flat-panelled door to a polished raised and fielded panelled door in any material and any design.

We work closely with all those involved in the specification of doors to ensure the very best approach is taken on each project whether it be restoration, conservation, new build or commercial building.

All our internal doors and doorsets are manufactured to order, giving total freedom of design and the ability to match existing doors perfectly or give a complete new individuality to a property.

We pay great attention to detail on our internal doors to guarantee that quality and craftsmanship are paramount in everything that we do.
SPECIAL MOULDINGS
We can run small and large quantities of any shape or size mouldings, quickly and competitively. We create all types of original mouldings and are equally happy to match and replace a wide range of sections in order to preserve original features, particularly in listed and other character buildings.

BUILDERS’ MERCHANT SERVICES
In order to provide a comprehensive service range to our trade customers, we can supply, cut-to-size and planed timber in all the well-known types such as European Oak, European Redwood, Sapele, Tulipwood and many more. We also offer a cut-to-size service for board materials such as MDF and veneers.

<thead>
<tr>
<th>TIMBER</th>
<th>COLOUR/FEEL</th>
<th>USES</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEDAR</td>
<td>Reddish brown shade, pleasantly scented, lightweight and easy to handle.</td>
<td>Lightweight construction work, internal and external joinery, timber boarding, summerhouses, etc.</td>
</tr>
<tr>
<td>MAPLE</td>
<td>White to a creamy white with a silky lustre. Straight grain with a fine uniform and smooth texture.</td>
<td>Cabinet making, furniture manufacture, good quality joinery work and turning.</td>
</tr>
<tr>
<td>AMERICAN WHITE OAK</td>
<td>Light yellowy brown to pale biscuit colour. Straight grained.</td>
<td>Widely used for interior joinery, panelling, furniture and shopfitting and flooring.</td>
</tr>
<tr>
<td>WENGE</td>
<td>Dark brown, almost black, straight grained and rather coarse texture.</td>
<td>High quality internal joinery, increasingly used for high specification kitchen and cabinet work.</td>
</tr>
<tr>
<td>EUROPEAN REDWOOD</td>
<td>Pale whitish brown colour, with wide grain.</td>
<td>External and internal joinery, furniture and construction. External windows and screens.</td>
</tr>
<tr>
<td>CHERRY</td>
<td>Golden yellow to pinkish red. Straight grained with a fine even texture and finishes very well.</td>
<td>Cabinet making, internal doors, decorative joinery and kitchens in particular. Not for exterior use.</td>
</tr>
<tr>
<td>ASH</td>
<td>Pale cream to greyish brown in colour, generally straight, with a coarse but even texture.</td>
<td>Joinery, furniture, shopfitting, panelling and flooring.</td>
</tr>
<tr>
<td>SAPELE</td>
<td>Dark reddish brown. Grain is interlocked or wavy with a medium to fine texture. Very stable.</td>
<td>External joinery including windows and doors, general joinery, internal doors and furniture.</td>
</tr>
<tr>
<td>EUROPEAN OAK</td>
<td>Light tan to biscuit colour. Usually straight grained but varies. Very durable/stable.</td>
<td>Interior and exterior joinery including windows/doors, ecclesiastical work, furniture and flooring.</td>
</tr>
<tr>
<td>AMERICAN BLACK WALNUT</td>
<td>Chocolate brown to purplish brown and finishes beautifully with outstanding grain and pattern.</td>
<td>Interior joinery including high quality kitchens, cabinetry and doors.</td>
</tr>
<tr>
<td>TULIP</td>
<td>White to pale olive green to brown. Straight grained with even texture and relatively stable.</td>
<td>Internal joinery including furniture and cabinetry manufacture, internal doors and panelling.</td>
</tr>
<tr>
<td>IROKO</td>
<td>Light yellow/golden brown colour and texture is coarse with interlocked grain. Similar to teak and is very hardwearing and durable.</td>
<td>External joinery including windows and doors, marine work and other external situations.</td>
</tr>
<tr>
<td>ACCOYA</td>
<td>Modified timber to have properties matching hardwoods and better. Outstanding stability and durability.</td>
<td>External applications such as windows and doors, decking and cladding.</td>
</tr>
<tr>
<td>BEECH</td>
<td>Colour whitish or pale brown with often speckled hint. Smooth texture and gives an excellent finish.</td>
<td>Furniture components, internal joinery, turnery and mouldings.</td>
</tr>
<tr>
<td>DOUGLAS FIR</td>
<td>Light reddish brown shade with vaned grain and a coarse texture.</td>
<td>Construction work, flooring, boat building, internal and external joinery and furniture.</td>
</tr>
<tr>
<td>IDIGBO</td>
<td>Yellow to light brown. The grain is straight with a medium to coarse texture. Medium weight, durability and stability.</td>
<td>Furniture and high class joinery both internally and externally.</td>
</tr>

</table>
GLASS & GLAZING

We can supply and fit all types of glass to suit the application or meet the building regulations required. From single glass in historical applications to high performance double or triple glazed units in regulated environments, we have experience in the glazing industry.

Not all our windows and doors leave the factory glazed due to handling and installation implications, so we work closely with the clients to ensure the installation is carried out conveniently and safely.

For further details regarding specific specifications and sections, please do not hesitate to contact our technical department.

SLIMLITE DOUBLE GLAZING

We now specialize in the latest Slimlite double glazing. This glazing solution enables clients to have double glazing in a traditional single glaze rebate, which is ideal for applications in conservation areas and listed buildings. For more detail, please enquire.
IRONMONGERY

We can supply all our windows and doors fitted with the appropriate ironmongery.

We are able to offer from an extensive range of quality, hard wearing architectural ironmongery products, which can either be supplied loose with your goods, or fitted to them. This includes espagnolette locks, sash locks and fasteners, door handles and a full range of window fittings.

The choice of ironmongery is vast. Finishes such as brass, chrome, nickel, antique black, and bronze can all be supplied and fitted in a selection of designs - from contemporary and modern to period or traditional.
At SB Joinery, we also have the benefit of our own in-house spray finishing department.

We can offer you the advantage of having your joinery factory finished in high-tech durable paint systems or performance stains and lacquers.

Our range of colours and tints covers the whole spectrum, and the majority of our coatings are now water-borne so they have minimal impact on the environment and allow the timber to flex and breathe.

We make sure the quality of our finish matches the quality of our work.
QUALITY STATEMENT

At SB Joinery we have a strong reputation for quality and craftsmanship. Much of our work is repeat business from satisfied customers and through recommendation.

As the nature of our work is mainly bespoke, it is not always possible to offer a standard guarantee across our entire range. Many factors such as the choice of timber and finish and the type of weather exposure where the joinery is installed, will have an impact on its lifespan.

However, we are confident of our manufacturing techniques and are happy to confirm the following:

- 10 years guarantee on factory fitted double glazed units
- Up to 5 years exterior durability on factory finished translucent coatings
- Up to 10 years exterior durability on factory finished opaque coatings

Full details of the durability statement for our coatings are available on request.

We cannot accept any liability for any damage and defects caused as a result of failing to adhere to our recommendations relating to storage, handling, installation, decorating, glazing and ongoing maintenance. Full details of our production fault policy and site guide are available on request.

ENVIRONMENTAL STATEMENT

We take our environmental responsibilities seriously. There are strong environmental arguments for using timber joinery rather than PVC-u, over 35% of the most hazardous chemicals listed by European governments are used in the production of PVC-u.

The heating in our factory is assisted by burning our own waste. This helps to cut down the number of vehicles visiting our workshops and limits our use of fossil fuels.

We also take care to source from CSA certified mills where possible and strive to ensure that our timber comes from properly managed forests.

The majority of our coatings are now water borne, with a minimal impact on the environment, allowing the timber to flex and breathe. We are registered for our coating-waste recycling operations.
Whatever your requirements, if it’s wood, contact us to see what SB Joinery can do for you.
