

Turnstiles

The Eagle Full Height Turnstile range is a high specification turnstile, suitable for controlling access in environments such as reception areas, health clubs, theme parks, public buildings and stadiums. Constructed from mild or stainless steel for long lasting and maintenance free performance, the EAG4000 offers a comprehensive range of basic features to suit individual client requirements, including 90 or 120 rotor assemblies, canopies, down lights and fire alarm activation (to engage free rotation). Turnstiles can be configured as bi-directional or single direction only. They are available with straight arm as standard or optional trombone arm. The PF4000 turnstile range is available in single or double according to your requirements.
