The Delta High Level Alarm is designed to detect high level water levels within sump pump (submersible pump) chambers.

The Delta HLA is an independent pump station high water level alarm, powered by 240V with a 6V battery backup in case of mains power failure. The alarm offers simple installation, requiring 4 fixings and connection of mains power, pump/s and a float switch. Status for 'All OK', high water alarm, and mains failure are clearly displayed on the front fascia via a green and red LED.

BENEFITS

- Quick and simple installation
- Robust and reliable
- 110db sounder for audible warning
- LED's for visual status and warning
- Test and reset buttons
- Battery backup in case of mains failure
- Easily upgradeable to the AlertMaxx 2, Wi-Fi enabled high level alarm for remote monitoring
- The foul water alarm is supplied with a broken finger float switch and shroud, this should be set to indicate duty pump activities, giving an early warning sign of failure
- The foul water alarm is supplied with a robust and reliable pendant type float switch
