*the Waterproof Solution*

*hertalan the waterproof solution*

*hertalan unprecedented possibilities for roofing and cladding*

#### *Hertalan*

As the first European manufacturer of EPDM membranes, Hertalan has provided quality for more than four decades. Based on our EPDM membranes and a series of clever accessories, Hertalan has developed a wide range of roofing and cladding systems. Architectural innovations to make roofs and facades water and windproof.

#### *Competent advice*

Hertalan UK is an experienced partner in project guidance. We have all the knowledge available to offer a complete service from preliminary design to realization. We provide advice to building owners and specifiers on the best use of our systems. Together with wind uplift calculations if necessary.

Regular training courses are provided for roofing contractors at our UK offices. RIBA approved CPD seminars for professional organisations can be conducted in-house, throughout the country and at our UK offices.

Hertalan UK is a subsidiary of the Hertalan Group and is responsible for the sales, marketing and technical specifications for Hertalan systems and products.

#### *Unique features*

Hertalan EPDM is a synthetic rubber and thanks to its unique qualities in all climates, hertalan is the ideal product for roofing and cladding systems alike. Hertalan EPDM has an exceptional life span (over 50 years, SKZ study march 2001), is 100% ozone and UV resistant, root resistant to FLL, self extinguishing, bitumen resistant, rapidly installed and complies with all current building regulations.

#### *Quality aspects*

- Long life: over 50 years for the system (SKZ study march 2001)
- Permanent elasticity
- Bitumen resistant
- Resistant to root penetration
- Biologically and ecologically safe in construction applications
- UV resistant weldable TPE strip
- Quick application using prefabricated membranes
- Lightweight : approximately 1,23 kg/m<sup>2</sup>/mm

#### *Certified quality meeting the following standards:*

- BBA 91/2728
- KOMO K4276/03
- ATG
- DIN

#### *Roofing and cladding systems*

Hertalan offers a wide range of EPDM rolls, membranes, strips, accessories and adhesive systems suitable for various architectural applications: from roofing systems on both new build and refurbishment projects to renewal of roof gutters and cladding.

- hertalan easy cover  
Prefabricated membranes suitable for quick application
- hertalan easy cover FR  
Fire retardant membranes suitable for quick application
- hertalan easy weld and hertalan easy weld MF  
Hot air weldable roll with a TPE strip on the upper- and underside (UV resistant)
- hertalan easy stick and hertalan easy stick plus  
Self adhesive EPDM roll. Also available with a hot air weldable TPE strip (UV resistant)
- hertalan S  
EPDM strips used as waterproof membranes in new constructions around window casings and cavity walls  
All seams and connections are possible with hertalan S and can be installed to create an impermeable seal
- hertaled  
An eco-friendly alternative to lead, consisting of EPDM with a 200mm band of aluminium reinforcement
