

VIA PAVE®

» A POLYMER MODIFIED THIN SURFACE COURSE SYSTEM

Want to create Britain's toughest road? ... then look no further!

VIAPAVE® utilises a high performance polymer modified bitumen to provide outstanding durability in even the most highly challenging applications.

Designed to keep Britain's drivers safe, VIAPAVE® has a highly skid resistant surface and also reduces spray in wet conditions.

The high quality materials used in our VIAPAVE® solution create a stable structure which results in a material which performs with a high resistance to rutting, excellent durability and the ability to achieve a texture depth designed to meet even the most demanding specifications.

Available in 14mm and 10mm nominal aggregate size, VIAPAVE® can meet the demanding performance required of today's ever growing road network.

CEMEX never compromise on quality and we are proud to say we have the BBA stamp of approval for this and other VIA products in our extensive range.

APPLICATIONS:

- > Motorways
- > Trunk Roads
- > Local Authority Roads

BENEFITS:

- > *Excellent high and low speed skid resistance*
- > *Reduced noise*
- > *Reduced spray*
- > *Enhanced deformation resistance for high stress areas*
- > *Long term durability*
- > *5 year warranty for integrity (clause 942 of the SHW)*
- > *2 year warranty for surface texture*
- > *Proven track record on UK motorways and trunk roads*
