Electric Comfort Radiator

The new radiator with built-in energy monitoring.

Energy Saving

Accurate, fast acting control is essential for reducing temperature overrun and minimising energy consumption

Electronic Control

The silent electronic thermostat is accurate to +/- 0.5°C and acts quickly to maintain consistent temperature levels

Four pre-set lifestyle heating plans

The radiator is programmed with 4 plans which can be adapted to most heating solutions

Popular with specifiers, contracts and home owners, this range is ideal for new building and refurbishment.

These radiators are fully programmable offering closer management of energy control with resultant cost savings.

The built-in energy monitor allowing you to see how much energy you are using to heat your room.

Features & Benefits

- Aluminium block with seal guarantee
- Digitally controlled electronic thermostat
- Dynamic fluid with high thermal inertia
- Temperature settings: Comfort, Economy, Frost Protection
- Four pre-set lifestyle heating schedules and three bespoke options
- Weekly programming
- Manual programming function
- Energy monitoring feature
- ON / OFF luminous display
- Locking keyboard function
- 5 radiator sizes and thermal outputs (from 600W - 1800 W)
Safety thermal limiter
- Temperature surface does not exceed 75 °C
- Thermal uniformity and even heat
- Safe, clean and easy to operate
- All radiators are coated externally in white
- All radiators are supplied with wall fixing brackets and template for easy installation
- Each radiator is supplied with 1.6m long UK power cable

CE Class I - 230 V

Reference	Power (W)	W x H (mm)	Depth (mm)	Weight (kg)
TSR-600	0600	435 x 580	95	11
TSR-900	0900	595 x 580	95	13
TSR-1200	1200	750 x 580	95	15
TSR-1500	1500	912 x 580	95	17
TSR-1800	1800	1070 x 580	95	21
