TOTO

THE PERFECT TRIO. BENEFITS OF TOTO TOILETS – AN OVERVIEW

All TOTO toilets are equipped with the ideal trio of features for long-lasting durability and unparalleled hygiene. A clever combination of technology and design creates toilet bowls that are not only easy to clean, but also meet high standards of hygiene over very long periods of time. This is why TOTO toilets are especially suitable for places with very high standards when it comes to both operation and hygiene. TOTO toilets are exceptionally well-suited to use in public areas.

The sophisticated technologies integrated in TOTO toilets make them some of the most hygienic ones on the market today. A report from one of Germany's most renowned hygiene experts and the German Hygiene Certificate substantiate these findings.

RIMLESS DESIGN

Rimless toilet bowls are a standard feature of all TOTO toilets. As a result, there are no difficult-to-reach areas below the edge in which bacteria and waste can accumulate, for quicker, easier and more thorough cleaning. TOTO has produced and sold over 8 million rimless toilet bowls since introducing them in 2002.

CEFIONTECT

All TOTO ceramics are treated with the extremely durable and smooth CeFiONtect glaze. This surface makes it practically impossible for dirt, waste and mould to accumulate. CeFiONtect-glazed surfaces can be cleaned using microfiber cloths without eroding the glaze over time.

TORNADO FLUSH

An important feature of every TOTO toilet is the Tornado Flush. Depending on the design, two or three jets create a powerful whirlpool of water in the toilet bowl, like a tornado, effectively cleaning every inch. The power of the water is bundled and strengthened in a single direction. No spot in the toilet bowl is left untouched. As a result, it is practically impossible for bacteria, germs and waste to accumulate.

CF IDEAL FOR USE IN PUBLIC PLACES

Public toilets are used frequently, cleaned quickly and need to be as hygienic as possible. The new CF toilet is equipped with all proven TOTO technologies to exceed the high hygienic standards of public washrooms.

DESIGN

The CF's simple form makes it extremely functional and compatible with a wide range of different styles and environments. The space-saving, compact contours make it ideal for use in public buildings. Of course, it features the well-known TOTO hygiene technologies: rimless design, CeFiONtect and Tornado Flush. The toilet also offers 3 l or 4.5 l flush options.

BENEFITS AT A GLANCE: QUALITY TRULY PAYS OFF

HYGIENE THAT SETS NEW STANDARDS

Independent researchers have compared * conventional toilets and TOTO toilets featuring our Tornado Flush. The results of these tests included the following:

The Tornado Flush design is especially suitable for use in areas in which hygiene is very important, such as hospitals, health care facilities and any places in which the toilet is frequently used by a number of different people.

Test result show that Tornado Flush eliminates waste, dirt and organisms from the ceramic surface with just one flush.

QUIETER THAN CONVENTIONAL TOILETS

TOTO toilets with the Tornado Flush feature were far quieter when compared to conventional toilets.

While the CF Tornado Flush reached a volume of just 68.8 dB, a comparable product was measured at 72 dB. This corresponds to a 41% higher noise level (3 dB $\hat{=}$ 41%). For example, a television at normal listening volume is 60 dB.

ENVIRONMENTAL MEDICAL TESTING

Results

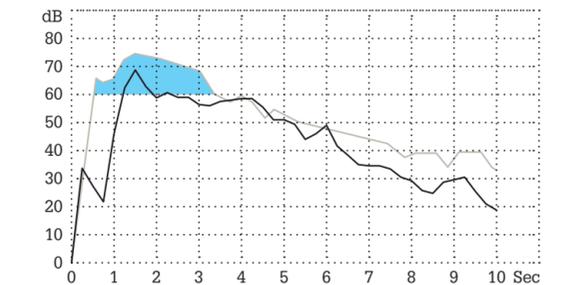

The TOTO CF toilet practically rules out the spread of intestinal germs (e.g. multidrug-resistant gram-negative bacteria).

- No infectious carriers were found on the bottom side of the toilet seat after flushing
- No infectious carriers were found outside the toilet

Background

Unlike conventional flush systems, the Tornado Flush on the CF toilet does not create any spray or mist. On the contrary: The whirling flow of water creates strong downward suction, preventing any potentially contaminated moisture from spreading to surrounding areas.

— Conventional toilet Exceeds 60 dB: 3.0 sec., peak: 72 dB
 — TOTO CF xceeds 60 dB: 0.75 sec., peak: 68.8 dB

HOW QUALITY PAYS OFF. EVERY DAY.

The investment in TOTO toilets pays off very quickly. The high quality and standards of hygiene guaranteed by TOTO toilets can greatly reduce cleaning and maintenance costs over a year's time.

CLEANING STAFF	REDUCED CLEANING TIME/TOILET	REDUCED CLEANING COSTS/TOILET	CLEANINGS PER TOILET/DAY	TOTO TOILETS	REDUCED CLEANING TIME/DAY	REDUCED CLEANING COSTS/DAY	REDUCED CLEANING COSTS/YEAR
20,00 €/h	30 SEC./toilet	0.17 €/toilet	3 (depending on the type of building, average)	50 toilets with Tornado Flush, CeFiONtect glaze and rimless bowl	75 min./day	25.00 €/day	9,125 €/year
