

GV Pyramid and Lantern

Generated on 18.06.2019

Detailed description

Glazing Vision Pyramid is a 45 degree fixed rooflight featuring glass to glass joints and dual colour thermally broken aluminium framework. The pyramid rooflight is manufactured with an aluminium apex cap which can be specified with an LED Downlighter.

Glazing Vision Octagonal Pyramid is a 45 degree fixed rooflight featuring glass to glass joints and dual colour thermally broken framework. The octagonal pyramid is an eight sided rooflight and is available with an aluminium apex cap which can be specified with an LED Downlighter.

Glazing Vision Lantern is a 45 degree fixed rooflight with glass to glass joints and dual colour thermally broken aluminium framework. The lantern is a contemporary evolution of more traditional roof lanterns.

Features:

- Minimum framework, maximum daylight.
- Heat soak tested toughened safety glass.
- Dual colour Qualicoat approved powder coat finish.
- Thermally broken framework.
- Simple and fast installation – no on site assembly.
- Unique LED Downlighter option on Pyramid.
