

## Bona White

Generated on 20.11.2019

### Detailed description

Primer for giving wooden floors a whitewashed look. The intensity can be controlled by applying it in one or several layers. Applied in a single layer it typically preserves the impression of raw, untreated wood. For a truly white impression, apply two or more layers. Highly forgiving formulation designed for easy roller application. For best effects, combine with a Natural, Extra Matt or Matt Bona lacquer.
