

## easy tiles

Generated on 08.04.2020

### Detailed description

Rubber tiles for forming walkways over Hertalan EPDM single ply membranes.

easy tiles provide a slip-resistant, impact-absorbent, soft surface on flat roofs, balconies, patios, walkways, terraces and fire escapes. They are either adhered to the membrane, or locked together with connector pins.

easy tiles are manufactured from recycled EPDM. The tiles are free-draining and porous, ozone and UV resistant.

### Product guidance - As Standard

#### Dimensions:

500 x 500 mm.

### Options

#### Type:

Adhered:

- Designed to be adhered to the waterproof membrane.
- Brick pattern design.
