

Mayor Ceramic Sunscreen Systems

Generated on 24.02.2020

Detailed description

Ceramic Mayor Sunscreen Systems are available with an oval or square profile ceramic plate, fixed to vertical aluminium rail supports. Ceramic Mayor is available in a range of three colours.

Features:

- Ceramic Mayor ceramic plate is an extruded through bodied porcelain, fired at 1200°C, creating a consistent quality plate of optimum accuracy in thickness and profile.
- Plates are available natural or with a glazed finish.
- Joints are formed using neoprene gaskets matching the plate profile.

Product guidance - As Standard

Framing system:

- Sunscreen components are supported on an aluminium rail system.
- Assembled units are attached to a vertical support structure.
- The structure will be dimensioned according to the given weight.

Product specification
