

Large Standard Horizontal Postbox model 2030-2 Secure - SDB Compliant

Generated on 14.07.2020

Detailed description

The model 2030-2 postal box conforms to British Standard EN 13724 (accepts A4 post without having to fold or bend the mail, and has an anti-theft baffle), and is also Royal Mail approved.

It also complies to Secured by Design and New Homes Guide 2019 requirements where applicable (contact DAD UK Ltd for details). Because of its size and features the model 2030-2 is well suited to apartments or offices developments which require a large number of letter boxes with better security features than the small standard mailboxes.

The wide choice of surrounds and frames allow the units to be integrated with either the interior or exterior decor of the building, on the wall, recessed into a wall or cladding, or free standing. The mailboxes and other components can be powder coated in any RAL colour or in stainless steel. A device is fitted as standard behind the flap to reduce the risk of mail theft, and the boxes in this range have good waterproof features. All boxes have a door with a high security DAD lock (30 000 variations) complete with two numbered keys. Extra keys available.

Suitable for internal and external use.

Product guidance - As Standard

Size (w x h x d):

300 x 220 x 385 mm.

Aperture:

265 x 30 mm.
