

Readyscreed SBR

Generated on 17.01.2020

Detailed description

Readyscreed® SBR is a ready to use, high performance, retarded screeding mortar. It is designed to give greater toughness, bond and durability than traditional screeds, with an increased resistance to wetting and erosion. It is suitable for all conventional screed applications but can be laid in much reduced thicknesses.

Options

Mix:

- 1:3 - For minimum strength of 30 N/mm² after 28 days.
- 1:4 - For minimum strength of 20 N/mm² after 28 days.
