

Fascias

Generated on 21.08.2019

Detailed description

Aluminium fascia profiles available in almost any size or shape. Square and rectangular profiles offer a traditional appearance to building eaves and are commonly used in refurbishment and replacement projects. Bullnose and quadrant fascias provide a contemporary finish to a building and elliptical and aerofoil aluminium fascias produce modern, sleek lines to an eaves design; they are especially useful when it is necessary to disguise a deep roof construction.

All fascia profiles can be designed to integrate with Contour soffits and are polyester powder coat (PPC) finished, available in a wide range of BS and RAL colours.

Product guidance - As Standard

Material:

Aluminium alloy sheet (Grade 1050A-H14/4015-H12 to BS EN 485, BS EN 515 and BS EN 573) with a minimum thickness of 2 mm.

Finish:

Polyester powder coated (PPC) and available in a wide range of BS and RAL colours.
