

102 mm round rainwater pipe

Generated on 24.02.2020

Detailed description

Dales round aluminium rainwater pipes are available in a variety of sizes.

Dales standard pipe brackets are designed to fix the pipe very close to the wall and firmly clamp the pipe into position. This makes it very difficult for vandals to climb.

Various non-standard components, e.g. offsets, stand off brackets and special hoppers, are available to suit individual requirements.

Accessories:

A wide range of standard components are available, however, as manufacturers, Dales Fabrications Ltd are able to offer purpose made components to suit individual project requirements.

Fasteners:

Consult manufacturer for recommendations.

Product guidance - As Standard

Dimensions:

- Diameter: 101.6 mm.
- Thickness: 1.6 mm.
- Length: 3 m.

Finish:

Type: Polyester powder coat.

Options
