

## GripDeck® Panels

Generated on 17.06.2019

### Detailed description

An anti-slip panel, used in public spaces including bridges, marinas, railway lines and access ramps. Manufactured from birch plywood, encapsulated with epoxy resin and surfaced with a hard-wearing aggregate.

### Features and benefits:

- A proven anti-slip walkway solution.
- Can be used as loadbearing decks with joist support, or as an overlay to an existing deck.
- Fixable to timber, steel, or concrete.
- All plywood is sourced in line with the requirements of the European Union Timber Regulation.
- Made to exact specifications (survey may be required).
- Has a life expectancy of over 20 years.

### Options

#### Panel thickness:

Allow an additional 2–3 mm for anti-slip and resin.

#### Colour/ Finish:

Panels are manufactured in a variety of standard colours including natural grey, black and yellow. For a full list of colour choices, consult manufacturer.
