

## 165 PROLIPRIM UNIVERSEL

Generated on 14.07.2020

### Detailed description

A highly versatile, translucent when dry, primer, designed to regulate substrate porosity to avoid air bubbles and facilitate the application of self-levelling mortars. It enhances adhesion on smooth or non-porous substrates and is particularly suitable for the adhesion of and on to anhydrite screed.

### Applications:

- Suitable for interior and exterior floor and walls.
- Bonded and un-bonded cement screeds, finished concrete slabs or in-situ concrete toppings.
- Existing ceramic and vinyl floor tiles, sanded paint, wood panels, parquet flooring.

### Benefits:

- Multi-purpose: all substrates.
- White when applied, translucent when dry.
- Enhances bonding and adhesion.
- Suitable for flexible substrates.
- Compatible with anhydrite screeds.
- External and internal applications.
- Suitable for use with underfloor heating systems.

### Product guidance - As Standard

#### Appearance:

White liquid.

#### Consumption:

100-200 g/m<sup>2</sup>.

### Product specification

#### Manufacturer
