

## Lazy Pad

Generated on 08.12.2019

### Detailed description

LazyPad foam is a high quality underlay shockpad that is used beneath an artificial grass surface on a children's play area or it can be used as protective underlay for roof gardens or patios as it also offers insulation properties.

On a play area as a safety surface the standard 25 mm foam offers a critical fall height (CFH) of 1.5 m (tested to BS EN 1177) when used with an artificial grass surface such as the Wonder Yarn product.

If a CFH is needed then a double layer of the product can be used. For example when used in conjunction with Wonder Yarn groundwork specification, two layers equal 2.5 m CFH.

The foam offers excellent drainage properties as it will not absorb liquids and is long lasting. The elasticity and shock absorption make it safe for playgrounds offering optimum fall protection and fantastic performance.

### Product guidance - As Standard

#### Roll width:

0.90 m ( $\pm$  3%).

#### Roll length:

2.25 m ( $\pm$  3%).

#### Material:

- Foam: Material: Recycled polyethylene foam, 100% closed cell (fully UV stabilized).
- Geotextile: Polyester (PET).

#### General:

- Permeability to BS EN ISO 11058: 0.017 m/s ( $\pm$  0.005 m/s).
- Static puncture resistance (CBR) to BS EN 12236: 1848 N.
- Resistant to weathering, acids (H<sub>2</sub>S<sub>0</sub>4) and alkalines (CA(OH)<sub>2</sub>).
