

Pensilis 1722

Generated on 17.09.2019

Detailed description

Semi-closed shelter with seat and advertising display, from Metalco's Stile collection.

Manufactured from hot dip galvanized and Powder-coated steel vertical beams, with a steel base plate. The roof is monolithic, and is formed by a tubular steel beam with supports, complete with shatter-resistant glass roof panes with polished edging cut.

The outdoor illuminated advertising display is built into the left-hand side of the shelter and is made up of a galvanized steel support frame, and extruded aluminium profile hinged case. The electrical system consists of three lamps positioned horizontally, fed by three reactors with insulated cables. The poster is held by a special stainless steel bar with a spring-action catch.

Supplied with the Sedis Seat (also from Metalco's Stile collection), which is made from 40 mm thick exotic wood timber slats, and has been treated with a water varnish. The seat is fixed to the lower rail of the shelter with 6 mm thick laser shaped fins.
