

3510 Hand Rail

Generated on 11.12.2019

Detailed description

The 3510 handrail/ combi-rail provides the support of a traditional round handrail, paired with the added benefits of a wall guard or crash guard. The two-part design provides good grasp for all users. The wall guard/ crash rail component extends beyond the handrail with an internal bumper to deliver superior impact protection.

Features and benefits:

- Designed to safeguard people from slips and falls.
- Protects walls from the damage caused by carts, wheelchairs and other hallway traffic.
- Protects interior walls from everyday wear and tear, and longer lasting damage.
- Provides ultimate hand grasp.
- The wall guard extends beyond the handrail with an internal vinyl bumper to deliver high impact protection.
- Easy to install and maintain.
- Mounted onto a 2 mm thick aluminium retainer.
- Available in a variety of colours.
- Cost effective.
- Contains no phthalates, halogenated fire retardants or BPA (bisphenol-a).
- Low fossil fuel consumption.

Approvals/ certifications:

- GREENGUARD™ Indoor Air Quality Children and Schools certified.
- May qualify for LEED™ and Green Globes™ credits – consult manufacturer for details.
- Fungal and bacterial resistant (to ASTM G21 and G22).
- Good impact resistance (to ASTM F-476).
- Designed to meet the requirements of BS 8300: 2009 and A1: 2010.
- Meets the Americans with Disabilities Act (ADA) and American National Standards Institute (ANSI) criteria.

Standard components (dependent on configuration):

- Aluminium retainer. Provides structural stability and allows extended lengths over 3.66 m.
- Mounting brackets. Keeps hands a safe distance from the wall.
- Cover. Available in a variety of colours to co-ordinate with other interior finishes.
- Inside/ outside corners. Provides a smooth transition for corner
