

Trovex Hygipod Safe - Shower

Generated on 04.07.2020

Detailed description

Prefabricated modular shower unit which is anti-ligature and prevents self-harm. Constructed of a rigid core and complete with a lockable access panel, sanitaryware and encapsulated with Trovex hygienic polyvinyl chloride (PVC) for cleanliness.

To minimize the risk of self-harm, the access hatch is set flush with the face of the pod, and the maximum clearance around the hatch is 0.7 mm. A galvanized steel frame door-stop is fitted to the rear of the hatch aperture, which further reduces ligature points and maximizes resistance to impact.

For additional security, the hatch has key-alike locks that have 90° key turn, to ensure keys cannot be removed unless in lock position.

Features and benefits:

- Single piece, joint free casing with thermoformed corners.
- Hinged, lockable and reinforced flush access panel.
- Fully pressure tested.

Product guidance - As Standard

Type:

- DVS SH07-040 high security shower head with SH07 - 12 1 station shower control system including tactile/ wave-on switch and AC17-047 thermostatic mixing valve.
- Cooper feed pipes and quarter turn lever service valve for bottom or top entry of hot and cold services.

Access panel:

- Flush with the face of the pod with a maximum clearance around the hatch of 0.7 mm.
- Galvanized steel frame door-stop to the rear of the hatch aperture.
- Projection hinges with 180° opening, which are mechanically fixed and resin bonded.
- Keyed-alike locks with 90° key turn.

Fixing:
