

Lacobel T

Generated on 22.10.2019

Detailed description

Float glass coated with high quality paint.

Features:

- Tested to the European Standard for Reaction to Fire (EN 13501-1).
- Aesthetically pleasing opaque glass; the coloured glass panels acquire a bright look due to the coat of varnish.
- Environmentally-friendly paint.
- Moisture resistant.
- May be used indoors and outdoors, wall cladding, facades, spandrels etc.
- Meets safety standards and withstands thermal shock.

Benefits:

- Durable appearance; the back of the glass with the layer of varnish is always positioned against the surface to be covered. Positioning it in this way also preserves the colour and appearance of the glass.
- High-quality finishing; the manufacturing process guarantees uniform finishing and the paint adheres flawlessly to the glass.
- Easy to assemble and maintain.

Performance:

Consult manufacturer's literature for full performance details of all products.

FIX-IN system:

Can be used in conjunction with the AGC FIX-IN system, a range of glass bonding products for interior application, including walls, furniture, doors, displays, offices and bathrooms.
