

## Stormdry Repointing Additive No.1

Generated on 22.10.2019

### Detailed description

A waterproofing admixture that is diluted with water. Can be added as a gauging solution to sand:cement or sand:lime repointing mixtures.

Product appears as a white/ milky liquid. Should be applied to the raked-out joint using a suitable pointing iron or repointing gun.

### Benefits:

- Significantly reduces the liquid water absorption of masonry.
- Easy to mix into the repointing mortar mixture.
- Functions with both cement- and lime-based mortars.
- The modified mortar is breathable.

### Product guidance - As Standard

#### Coverage:

One 500 ml bottle will provide sufficient mortar to repoint an area of approximately 5 m<sup>2</sup> of masonry.

#### Application:

- Before repointing mortar is applied, raked-out mortar joints should be wetted, e.g. by flicking water using a wet brush.
- To be diluted with clean tap water in the ratio of one part Stormdry Repointing Additive No.1 to nine parts water by volume.

### Product specification

#### Manufacturer

- Name: Safeguard Europe Ltd
