

illbruck MT440 High Grip Original

Generated on 24.02.2020

Detailed description

MT440 is a general purpose high bond strength synthetic resin adhesive with good gap filling properties. It has high initial grab and can be used in a wide variety of bonding applications.

Applications:

- Aluminium and PVC-U nosings and extrusions to concrete and wooden stairs.
- Carpet gripper systems to most sub floors without using tacks or nails.
- Direct fixing of battens, architrave, etc. to walls without other fixings.
- Fixing floor boarding and skirting boards.
- Laminated plastics metals and ceramics.
- Wall cladding, direct wall studding, internal wall surfaces or timber battens.
