

Over Fascia Ventilators

Generated on 19.06.2019

Detailed description

A range of over fascia ventilators suitable for new build and refurbishment applications.

Manufactured from injection moulded polypropylene and designed to provide a clear protected air entry point into the roof space.

It has smooth leading edge designed to be fitted on top of the fascia board.

The over fascia ventilators prohibit large insects gaining access but wide enough not to be blocked by debris, paint or water droplets.

Options

Type G1200N Over fascia ventilator:

- Designed to provide a positive airflow into the roof space between the felt and the fascia board. The product is suitable for new and refurbishment work and for mono roof abutment details. Manufactured from injection moulded polypropylene and provides 10 000 mm²/m free airflow, equivalent to a continuous 10 mm gap.

Type G2500N Over fascia ventilator:

- Designed to provide a positive airflow into the roof space between the felt and the fascia board. The product is suitable for new and refurbishment work and for flat roof abutment details. Manufactured from injection moulded polypropylene and provides 25 000 mm²/m free airflow, equivalent to a continuous 25 mm gap.
